

Coronavirus Disease 2019 (COVID-19)

Symptoms of Coronavirus

Older adults and people who have severe underlying medical conditions like heart o seem to be at higher risk for developing more serious complications from COVID-19 illr

Watch for symptoms

People with COVID-19 have had a wide range of symptoms reported – ranging from mild symptoms to severe illness.

Symptoms may appear 2-14 days after exposure to the virus. People with these symptoms or combinations of symptoms may have COVID-19:

- Cough
- Shortness of breath or difficulty breathing

Or at least two of these symptoms:

Self-Checker

A guide to help you make decisions and s

- Fever
- Chills
- Repeated shaking with chills
- Muscle pain

- Headache
- Sore throat
- New loss of taste or smell

Children have similar symptoms to adults and generally have mild illness.

This list is not all inclusive. Please consult your medical provider for any other symptoms that concern you.

When to Seek Medical Attention

If you have any of these **emergency warning signs*** for COVID-19 get medical attention immediately.

- Trouble breathing
- Persistent pain or pressure in the chest
- New confusion or inability to arouse
- Bluish lips or face

*This list is not all inclusive. Please consult your medical provider for any other symptoms that concern you.

Call 911 if you have a medical emergency: Notify the operator that you have, or think you have, a medical emergency. If possible, put on a cloth face covering before medical help arrives.
